

About the Instructor

Monica Torres, the founder/owner of start-up company NXT Generation Mortuary Support, she is a CFSP and is a licensed Funeral Director, Embalmer, Cremationist, Desairologist and Reconstructive Specialist. Although her passion lies deep in the trenches of the prep room, Monica finds great pleasure in a leadership role that allows her to serve funeral homes whether it is by offering online or in person embalming support services or introducing funeral homes to her strategic partners.

While still an Embalming Intern, she completed a guided text and Desairology course named "Airbrush Artistry for Cosmetic Use in the Prep Room and Restorative Art," the course is still in use as an innovative training tool in desairology for embalmers and students of Mortuary Science. Her intensive training in post mortem reconstructive demi-surgery was completed at the Fountain National Academy. of Professinal Embalming Skills. Monica's training in advanced embalming practices inspired her to help modernize antiquated embalming techniques for hair restoration and viewing. In 2015 Monica was honored Vernie Fountain with the Distinguished Professional Service Medallion for introduction of her post mortem hair implantation procedure, the No Wax Torres Technique.

Monica earned her bachelor's degree in Recreation Management with Emphasis in Tourism and Event Planning from Arizona State University in 2001 and has been licensed with the California and Arizona State Boards of Cosmetology for over 20 years.

Seminar Topics

Progressive Desairolgy for the Modern Embalmer - Ms. Torres will give insightful tips on embalming restoration for hands and reveal the technical procedure for her innovative hair restoration technique coined by other professionals as the NO WAX TORRES TECHNIQUE. This seminar focuses on the value of open casket viewing and the technical skill of Embalming and Restoration. It also offers instruction on hard case cosmetic camouflage for hand restoration with the use of traditional mortuary cosmetics along with new cutting-edge cosmetic application techniques. Learn the ease of post mortem hair color correction made simple. This technical course will change the way you offer families their last viewing experience.

Family Assisted Dress Experience - Monica shares ideas on how to create an “EXPERIENCE” centralized on the body and helping families to fill the void and disconnect between the time of death and cremation or burial. The FADE program was designed with cremation families in mind. This new twist on a century’s old concept will help your firm recapture lost revenue and give insight to licensees of all experience levels.

A Case Study on Decomposed Cases - This case study on preparation of decomposed remains guides the embalmer through each phase of the embalming procedure. We will begin with traditional core elements of Disinfection, Preservation and Restoration and finish with a journey into the future of embalming and explore “Post Mortem Cosmetic Rejuvenation.” This seminar is POWER PACKED with embalming tips.
